

YOU CAN MAKE A DIFFERENCE IN HYPERTENSION RESEARCH!

A small study showed that art therapy can lower blood pressure. Dr. Traci's House seeks volunteers with hypertension to participate in a study on the effects of art therapy on high blood pressure. This is a larger study to verify the prior results and is sponsored by The National Endowment For The Arts and Florida State University.

The study will be held at two locations.

Dr. Traci's House
904 E Henry Ave.
Tampa, FL 33604

North Florida Rural Health
680 Maple St.
Chattahoochee, FL 32324
